Developer Portal: Step 3 (Overview)

- Step 3.1
- Click the overview App you have created

Overview

- Step 3.2
- It shows 3 categories.
 - Summary: Add APIs
 - Credentials: Generate your own new Credential username and password
 - Subscriptions: Shows the APIs that you have added

Dashboard / Test1

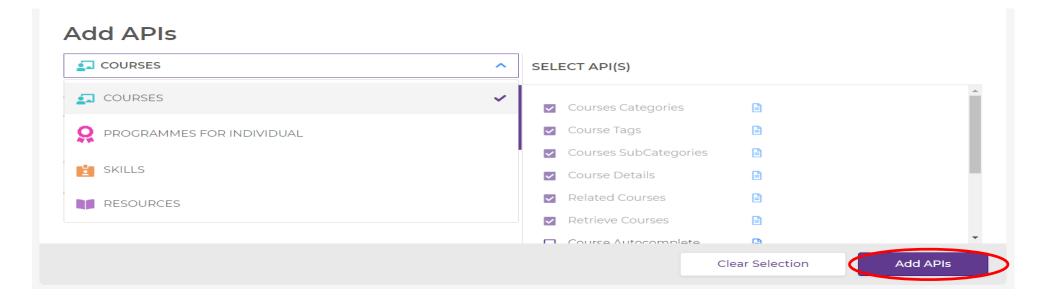

Summary

Credentials

Subscriptions

Developer Portal: Step 4 (Add APIs)

- Step 4.1
- Select one of any of the 4 categories and then select any APIs you want to explore
- Then click Add APIs it will show on the subscriptions.

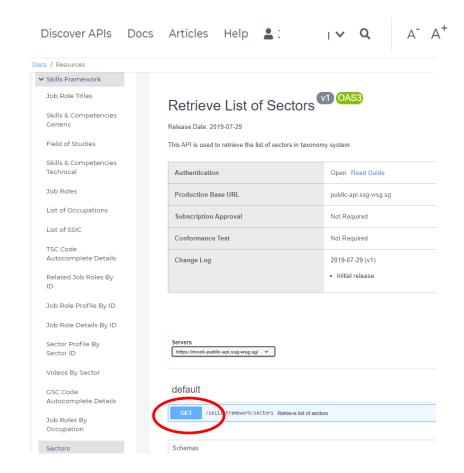

Developer Portal: Step 5

- Step 5.1
- Click Discover APIs

- Step 5.2
- Then choose any one of the 4 categories;
 For E.g.: Resources → Skills Framework → Sectors
- Click on the "Get" or "Post" to expand the section

Developer Portal: Step 5

- Step 5.3
- Click Try it out and execute to get the json file output
- This is to show the mock example of GET request

default /skillsFramework/sectors Retrieve list of sectors This API is used to retrieve all sectors. Parameters Name Description API version x-ani-version Default value : v1 Code application/json

https://mock-public-apl.seg-wag.sg/ ~

Output: Json File

Install Node.js

Go https://nodejs.org/en/ to install the runtime software

Node.js® is a JavaScript runtime built on Chrome's V8 JavaScript engine.

New security releases now available for all release lines

Download for Windows (x64)

Or have a look at the Long Term Support (LTS) schedule.
